PROFESSIONAL SUMMARY

Third-year B.Tech Data Science student at VIT Pune with 2 published patents (IPO), peer-reviewed research (IJERT), and 2 data analytics internships completed in Year 1, Published dataset on mendeley. Built ML pipelines for loan default prediction, early financial-distress detection and RAG-based document intelligence using Python, scikit-learn, and vector databases. Experienced with Power BI dashboards, SQL optimization, and exploratory analytics on datasets of 50K+ records. Targeting Data Science and AI/ML internship roles in fintech, analytics, and applied AI.

EDUCATION

B.Tech in Computer Science (Specialization: Data Science) 2024 – 2028

Vishwakarma Institute of Technology (VIT), Pune

TECHNICAL SKILLS

Languages: Python, SQL
ML / Data Science: scikit-learn, XGBoost, Random Forest, TensorFlow, CNNs, Time-Series, Feature Engineering, Model Evaluation.
Generative AI / LLM: RAG, Vector Databases, Embeddings, Semantic Search, LLM Observability (Evidently).
Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Jupyter Notebook.
Databases & Tools: MySQL, Git, Excel, GitHub.

PROFESSIONAL EXPERIENCE

Data analyst Intern – Delta System Aug 2025 – Nov 2025

- Optimized SQL queries using indexing, joins, and aggregation tuning; created reusable query templates that improved data accessibility across development and reporting workflows
- Validated database outputs for production readiness by collaborating with the engineering team on schema organization and output testing
- Reduced ad-hoc query redundancy by establishing a structured query library, enabling faster data retrieval for recurring business requests. **Experience letter** .

Data Science Intern – Cognifyz Technologies (MSME India) Mar 2025 – Apr 2025

- Performed EDA on real-world datasets using Python (Pandas, NumPy, Matplotlib), extracting actionable insights on customer behaviour and product trends
- Cleaned, transformed, and visualized structured data to support downstream business analysis and stakeholder reporting.

PROJECTS

Kaggle-Prep :- A CLI- tool for automated EDA , for students (3.3K downloads)- in one month.

- Built a developer-friendly command-line tool to automate repetitive tasks: EDA. LINK
- Supports plug-in dataset profiles; reduces notebook setup time by ~60% for structured tabular competitions

Early Financial Warning System for Banks| Python, scikit-learn, XGBoost, Pandas, Jupyter

- Trained a classification model achieving ~95% accuracy to detect early financial distress signals in banking data, enabling proactive risk intervention.
- Engineered features from financial indicators and payment history; evaluated model performance using precision, recall, and F1-score across imbalanced classes.

Loan Default Prediction Dashboard | *Python, scikit-learn, Pandas, Power BI*

- Built an end-to-end ML pipeline to classify at-risk loan applicants from application and payment-history data, enabling targeted collection strategy

- Designed interactive Power BI dashboard allowing stakeholders to filter risk exposure by customer segment and region; supports early intervention in lending operations.

Document Intelligence System (RAG)| *Python, Embeddings, Vector Database, RAG*

- Built an automated document crawler to extract and semantically index unstructured text using embeddings and a vector database.
- Implemented RAG pipeline enabling context-aware document Q&A; applicable to KYC automation, compliance processing, and enterprise knowledge bases. (reduced query time by ~30%)

CERTIFICATIONS & ACHIEVEMENTS

- 2 Patents Published (IPO): AgriPhenotyper (IN202521098967) — plant phenotyping AI system; Food Spoilage Detection System (202621027882)
- Published Research: "Smart Food Container" — International Journal of Engineering Research & Technology (IJERT), Paper ID: IJERTV14IS110031
- Smart India Hackathon (SIH) 2025 Participant — Carbon Credit Tokenization on Blockchain (Solidity)
- Complete Guide to Power BI for Data Analysts — Microsoft Press
- SQL (Basic) Certificate — HackerRank (275 pts, Bronze) | Problem Solving (Basic) — HackerRank | 100 leetcode problems.
